

- Quick Retrospective
 - What did we do well?
 - Setting up the foundation of the project.
 - Collaboration was very good.
 - Communication was decent.
 - We kept costs down!! It's only at 0.003\$.

| | | |
|--|-------------------------|----------|
| DynamoDB | | USD 0.00 |
| US East (Ohio) | | USD 0.00 |
| Amazon DynamoDB PayPerRequestThroughput | | USD 0.00 |
| \$0.25 per million read request units (Ohio) | 6,353 ReadRequestUnits | USD 0.00 |
| \$1.25 per million write request units (Ohio) | 1,135 WriteRequestUnits | USD 0.00 |
| Amazon DynamoDB USE2-TimedStorage-ByteHrs | | USD 0.00 |
| \$0.00 per GB-Month of storage for first 25 free GB-Mo | 0 GB-Mo | USD 0.00 |

- Our daily checkins were very useful!
- What could we improve on?
 - Actually communicate what we will be delivering and finishing it. If we have any doubt of finishing it, then we need to let the group know :).
 - We need to self-assess more. Maybe take a moment in the morning to see if you'll actually be able to do stuff.
 - Focus on the deliverables more.
 - Planning could have been better, i.e. more dev tasks and what will actually go into it, then also changing it and how we need to communicate that.
 - We need to parallelize better.
 - If we're stuck on a problem for more than two hours, please reach out!

- Maybe report how long you think it'll take to finish what you're currently working on in the daily checkins.
 - Could potentially talk about if you're working on other stuff and whether you're working on stuff for the project or not.
- Key takeaways
 - We're all in a group together and we're all in this together!
 - Communication is key!
 - We need to add more details to our daily checkins.
 - What you're working on that day.
 - How much work you have left for things.
- Sprint 2 planning
 - Are there any concerns with what's been planned?
 - I (Kelly) think we should probably set much lower commitments this sprint, especially for the TA. There's a lot of residuals from sprint 1 that we need to deal with (admittedly, most of them are because of me LOL). Here is how our sprint 2 is looking like: 
 - So the suggestion to do a fully complete personal calendar + one user story for interactions seems reasonable!
 - What do we want to commit to for sprint 2?
 - Options
 - A fully complete Personal Calendar (since it's the smaller feature of the two in terms of dev tasks) and a minimum of one user story completed from the Interactions with Posts feature (at least have reply to other posts done)
 - I (Cynthia) don't think we'll have a problem arguing for these features as our other core feature, the hidden achievement system, seems less important than these two features
 - Post interactions feature is very large, I (Tara) doubt I'll be able to get everything done for the backend in time for Qiwen to do good work on it, so I agree it should be kept as a lower priority.
 - Write any extra dev tasks + time estimates as necessary
 - Here's a visual representation of our current feature breakdown (I like mindmaps lol)
 - <https://mm.tt/app/map/3468763896?t=WKPxG36lgD>

- Please do this before the end of the day on Saturday, after this, I (Cynthia) will add everything to GitHub and organize it
- I've put off moving sprint 1 issues to sprint 2 in GitHub so we have more time to get things sorted
 - I will move all these issues to sprint 2 sometime before the meeting with the TA
 - Sounds good, we should probably revise the current issues we have so far anyways. I (Kelly) personally felt like the issues didn't capture the scope of each feature if that makes sense. But this was also something we expected in sprint 0.
 - Definitely read through the dev tasks carefully to understand if they capture the full scope of what we'll be doing. Change or add any as needed for sprint 2. I (Cynthia) wrote some bc I was bored and wanted to do something, so I totally understand wanting to change them 😊
 - The dev tasks were a really good start!! We went into the deep end for sprint 1 so it's to be expected that we didn't foresee all possible dev tasks. Thank you for keeping everything so organized, it's been making a huge difference in how things are running :)) <3
 - If anyone thinks the user stories should be rearranged, please bring it up with the group (in Discord since we won't have time in this meeting). If we decide something should be changed, I (Cynthia) will rearrange things in the spreadsheet and GitHub.
 - Make sure the UI dev tasks are split into mobile and website. Development for both are completely different environments (Android Studio vs VS). Time estimates will be "doubled" when you consider it. Although mobile may be more difficult than the Web.
 - I'll (Cynthia) do this in GitHub when opening the issues, so we don't have to waste all the space on the spreadsheet. I'll add an hour to the time estimate on the mobile dev task based on what was entered in the spreadsheet.
- Action items

- Add time estimates to the spreadsheet
- Write any extra dev tasks as necessary in the spreadsheet by EOD tomorrow
- Add sprint 2 issues to GitHub (Cynthia)
 - Add an hour to all the time estimates for mobile dev tasks
- Move open sprint 1 issues to sprint 2 milestone in GitHub (Cynthia)
- Add a user story to the interactions with post to be able to edit and delete a post/comment on the spreadsheet (Cynthia)
